Fishers of Fish and Fishers of Men Jan 12 2021 The metaphor is a hallmark of Classical Hebrew poetry. Some metaphors, such as "Yhwh is king" or "Yhwh is warrior," play a foundational role. The same does not hold for metaphors from the fishing industry. Because they had access to only two major freshwater sources, archaeological research demonstrates that this industry did not play a major socioeconomic role in ancient Israel. Fishing has nevertheless made a substantial contribution to prophetic and wisdom literature. All metaphors manifest reality, but given the physical circumstances of a largely agrarian, nonmarine society, what does the sustained presentation of fishing metaphors in the Hebrew Bible communicate? Examining the use of fishing images in the Hebrew Bible is a formidable task that demands an open mind and a capacity to mine the gamut of contemporaneous evidence. In Fishers of Fish and Fishers of Men, Tyler Yoder presents the first literary study devoted to the fishing images used in the Hebrew Scriptures as well as in the Mesopotamian textual records. This calls for a penetrating look into cultural contact with Israel's neighbors to the east (Mesopotamia) and southwest (Egypt). Though nearly all fishing metaphors in the Hebrew Bible carry overt royal or divine connotations that mirror uses well-attested in Mesopotamian literature, this comparative analysis remains a largely untapped area of research. In this study of the diverse literary qualities of fishing images, Yoder offers a holistic understanding of how one integral component of ancient Near Eastern society affected the whole, bringing together the assemblage of disparate materials related to this field of study to enable scholars to integrate these data into related research and move the conversation forward.

The Defendant in International Criminal Proceedings Jul 06 2020 It is often said that criminal procedure should ensure that the defendant is a subject, not just an object, of proceedings. This book asks to what extent this can be said to be true of international criminal trials. The first part of the book aims to find out the extent to which defendants before international criminal courts are able to take an active part in their trials. It then in-depth look at the procedural regimes of international courts, viewed against a benchmark provided by national provisions representing the main traditions of criminal procedure and by international human rights law. The results of this comparative endeavour are then used to shed light, from a practical point of view, on the oft-debated question whether (international) criminal trials should be used as a tool for writing history or whether, as claimed by Martti Koskeniemi, pursuing this goal leads to a danger of "show trials".

Resisting Rights Aug 07 2020 From 1948 to 1966, the United Nations worked to create a common legal standard for human rights protection around the globe. Resisting Rights analyzes the Canadian government's changing policy toward this endeavour from the 1940s to the 1970s, exploring how developments in international relations and evolving cultural attitudes within Canadian society created pressure on the federal government to overcome its initial reluctance to be bound by international human rights law. This timely study situates current policies within their historical context and debunks the myth that Canada has been at the forefront of international human rights policy since its inception.

In the Time of the Butterflies Oct 21 2021 It is November 25, 1960, and three beautiful sisters have been found near their wrecked Jeep at the bottom of a 150-foot cliff on the north coast of the Dominican Republic. The official state newspaper reports their deaths as accidental. It does not mention that a fourth sister lives. Nor does it explain that the sisters were among the leading opponents of Gen. Rafael Leonidas Trujillo's dictatorship. It doesn't have to. Everybody knows of Las Mariposas—"The Butterflies." In this extraordinary novel, the voices of all four sisters—Minerva, Patria, María Teresa, and the survivor, Dedé—speak across the decades to tell their own stories, from hair ribbons and secret crushes to gunrunning and prison torture, and to describe the everyday horrors of life under Trujillo's rule. Through the art and magic of Julia Alvarez's imagination, the martyred Butterflies live again in this novel of courage and love, and the human cost of political oppression.

Enzyme Handbook 14 Nov 09 2020 Today, as the large international genome sequence projects are gaining a great amount of public attention and huge sequence data bases are created it becomes more and more obvious that we are very limited in our ability to access functional data for the gene products—the proteins, in particular for enzymes. Those data are inherently very difficult to collect, interpret and standardize as they are highly distributed among journals from different fields and are often subject to experimental conditions. Nevertheless a systematic collection is essential for our interpretation of the genome information and more so for possible applications of that knowledge in the fields of medicine, agriculture, etc. Recent progress on enzyme immobilization, enzyme production, enzyme inhibition, enzyme regeneration and enzyme engineering has opened up fascinating new fields for the potential application of enzymes in a large range of different areas. It is the functional profile of an enzyme that enables a biologist or physician to analyze a metabolic pathway and its disturbance; it is the substrate specificity of an enzyme which tells an analytical biochemist how to design an assay; it is the stability, specificity and efficiency of an enzyme which determines its usefulness in the biotechnical transformation of a molecule. And the sum of all these data will have to be considered when the designer of artificial biocatalysts has to choose the optimum prototype to start with.

Healing in the Gospel of Matthew Jul 18 2021 Walter Wilson adopts an interdisciplinary approach to the healing narratives in the Gospel of Matthew, combining the familiar methods of form, redaction, and narrative criticisms with insights culled from medical anthropology, feminist theory, disability studies, and ancient archaeology to understand the New Testament's longest and most systematic account of healing, Matthew chapters 8 and 9. Close exegetical readings culminate in a final synthesis of Matthew's understanding of healing, how Matthew's narratives of healing expose the distinctive priorities of the evangelist, and how these priorities relate to the theology of the Gospel.

Human Nature and Social Life May 16 2021 The book explores how humans are distinct social beings whose relations nevertheless extend into nonhuman spheres in various ways.
