Technology's War Record Nov 10 2020 This book was written to document the part played by the Massachusetts Institute of Technology, its staff, its former students and its undergraduates. Tales of skill, self-sacrifice and courage displayed by "Tech" men are preserved as an inspiration to their comrades and descendants. Attention is directed to the fact that such an institution as "Technology" is not only a valuable auxiliary in developing commerce and industry in time of peace but that in time of national emergency it becomes an indispensable part of the Nation's military organization.

Reconceptualising education support services in South Africa Aug 20 2021 Inclusive education has been phased into South Africa since 2001 but relies heavily upon adequate support services to support learners and teachers experiencing barriers to learning and development. This book focuses on the different levels of support provided in South African education – from School-based Support Teams to District-based Support Teams through to special and full-service schools, and how these could be reconceptualised to provide improved support to learners and teachers. Current research indicates that inclusive education is being implemented in varied and fragmented forms across the country, and the point of departure of this work is that education support services need to be improved and reconceptualised to ensure better support for inclusive education.
