International Financial Reporting Standards Feb 12 2021 International Financial Reporting Standards: A Framework-based Perspective links broad concepts and general accounting principles to the specific requirements of IFRS to help students develop and understand the judgments required in using a principle-based standard. Although it is still unclear whether the US will adopt IFRS, the global business environment makes it necessary for accounting students and professionals to be bilingual in both US GAAP and IFRS. This comprehensive textbook offers: A clear presentation of the concepts underlying IFRS A conceptual framework to guide students in interpreting and applying IFRS rules A comparison between IFRS and US GAAP to develop students' understanding of the requirements of each standard Real world examples and case studies to link accounting theory to practice, while also exposing students to different interpretations and applications of IFRS End of chapter material covering other aspects of financial reporting, including international auditing standards, international ethics standards, and corporate governance and enforcement, as well as emerging topics, such as integrated accounting, sustainability and social responsibility accounting and new forms of financial reporting Burton & Jermakowicz have crafted a thorough and extensive tool to give students a competitive edge in understanding, and applying IFRS. A companion website provides additional

support for both students and instructors.

Convergence of IFRS and US GAAP Jun 30 2022 The main idea behind this paper is to highlight the background and current movements of International Accounting Standards Board (IASB) and Financial Accounting Standards Board (FASB) toward convergence of International Financial Reporting Standards (IFRS) and US Generally Accepted Accounting Principles (GAAP). Subsequent to introductory chapter the second chapter discusses the historical perspectives describing the various events that shaped the IASB and FASB current efforts towards convergence of IFRS and US GAAP. The third chapter describes the strategies policies and procedures adopted by the IASB/FASB to achieve the goal for international accounting convergence. The focus is on the maintainability of investors' interest and integrity of capital markets that can only be achieved by observing methods required for high quality accounting standards. Fourth chapter identifies the substantive differences and similarities between IFRS and US GAAP and catalogue those differences in which a specific accounting treatment is permissible under one basis of accounting standards but not permissible under the other.

Accounting for brands according to US-GAAP and IAS Oct 23 2021 Inhaltsangabe: Abstract: In der heutigen Wirtschaft werden Unternehmenswert und Wachstum hauptsächlich durch immaterielle Vermögensgüter erzeugt. Marken spielen eine besonders wichtige Rolle in diesem Zusammenhang. Ziel dieser Arbeit war es aufzuzeigen wie speziell Marken und Markennamen in Bilanzen und Jahresabschlüssen behandelt werden. Die Besonderheiten der Rechnungslegung für Marken, die Probleme der Bewertung und die Möglichkeiten welche durch die Aufnahme in die Bilanz entstehen, werden sowohl nach US-GAAP als auch nach IAS betrachtet. Die Abhandlung ist aufgrund ihrer internationalen Aktualität auf Englisch verfasst, aber auch für den deutschsprachigen Leser sehr gut

verständlich. In today's economy wealth and growth are mainly driven by intangible assets. In a knowledge-based economy the success of an enterprise is driven by intangible factors, while control over physical resources becomes progressively unimportant. In most successful companies, brands and other intangible assets outperform physical assets by a notable margin. Brands, the most valuable and sustainable corporate assets, and trademarks play an especially important role. This paper aims to show how to account for brand names in financial statements according to US-GAAP and IAS. The objectives of this paper are to present and discuss the disclosure of brands as intangible assets, in the balance sheet according to US-GAAP and IAS. Therefore, the recognition criteria of both accounting regulations will be examined. The initial and subsequent measurement techniques will be discussed, and problems in this field will be exposed and criticized. The paper also aims to show criticisms of the current regulations and to discuss possible future developments. New ideas and solutions for the problems arising with the disclosure and measurement of intangible assets and brands will be presented and discussed in Chapter four. Chapter five will include a summary of the findings and a critical statement about the problems discussed in this paper.

GAAP Guidebook Mar 16 2021 Generally Accepted Accounting Principles (GAAP) are used as the basis for financial reporting. The original GAAP documents span thousands of pages, and so are

difficult to research. The GAAP Guidebook solves this problem by condensing GAAP into a single volume. This book describes the key elements of each topic, how accounting information is disclosed, and where to look in the FASB Codification source documents for additional information. The text contains hundreds of practical examples that show how to apply GAAP to real-world situations, as well as sample journal entries and usage tips. In short, the GAAP Guidebook serves as a handy reference for accountants who need quick answers to difficult problems.

U.S. GAAP for Life Insurers Aug 21 2021

An Executive's Guide for Moving from U.S. GAAP to IFRS Jan 26 2022 International Financial Reporting Standards (IFRS) are becoming the benchmark accounting standards for companies listed on international stock exchanges. The SEC treats them as equivalent of US Generally Accepted Accounting Principles (GAAP) and is even contemplating allowing their use instead of US GAAP. They are mandatory in Europe, Australia and South Africa. Canada, China, Brazil, Japan and India are planning to use them from 2011. Anybody interested in companies listed on the US stock exchanges needs to know something about them because hundreds of foreign companies are already using them to report in the US. Anybody interested in international business has to know these benchmark financial reporting rules. This book will explain the complex inter-relationships between the International Accounting Standards Board (the creator of IFRS), the Financial Accounting Standards Board (FASB) and the Canadian Accounting Standards Board (AcSB), their work programme and their plans for the future. It will look at a series of central accounting issues such as revenue recognition, liabilities, pensions, off-balance sheet vehicles, impairment, intangible assets etc. and discuss how IFRS differ from US and Canadian GAAP. It will explain the organisational structure and background of the IASB and it will look at the potential impacts to financial reporting by American

companies.

Financial Reporting and Auditing May 18 2021 A recent survey of Ireland's top 500 companies suggests that fraud levels in Ireland are on the increase and have never been higher. This book considers the state of auditing, financial reporting and the financial aspects of corporate governance in the UK and Ireland. It explores in detail the problems which the increasing incidence of fraud in our society pose for the auditor. It looks at the sometimes difficult relationship between the auditor and company directors and examines the liability crisis facing auditors. The book also addresses growing regulatory and legislative burdens on company directors.

Dual Reporting for Equity and Other Comprehensive Income under IFRSs and U.S. GAAP Dec 25 2021 Under IFRS, U.S. GAAP, and the SEC rules and regulations, business enterprises must recognise measure and disclose information regarding equity items on the face of the statement of financial position, other specific statements, or in the notes to the financial statements. However, under both IFRS and U.S. GAAP there is no all-inclusive general standard on stockholders' equity. This book clarifies the process of reporting stockholders' equity in a manner which can be reconciled under all the relevant standards. "Not only has the author addressed the informational needs of the players in the accounting industry, he has also drawn, based on his vast experience, practical implications of

reporting under both standards.” —Noraini Mohd Nasir, Journal of Financial Reporting and Accounting

Introduction to Financial Accounting Mar 28 2022 This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

Convergence with Accounting Standards Jun 06 2020 Project Report from the year 2012 in the subject Business economics - Accounting and Taxes, grade: 100, Argosy University, course: Contemporary Accounting Theory (B7630), language: English, abstract: The International Accounting Standards Board (IASB) and the Financial Accounting Standards Board (FASB) set out to complete their ambitious goal of convergence before the year of 2015. The author provides an outline of these efforts, emphasizing the importance and ramifications of International Accounting Standards (IAS) as a means to globally improve quality and clarity of financial reporting across financial sectors. An extensive review of pertinent literature is given, visualizing the two-pronged approach of converging global accounting standards while continuing to improve the US Generally Accepted Accounting Principles (US GAAP). As no significant agreement has been implemented since 2008, the main areas of interest to this date remain income tax, revenue recognition, leases, and financial instruments. The present work puts in perspective the roadmap by the Securities and Exchange Commission (SEC), whilst assigning pivotal roles in the harmonization process to Certified Public Accountants (CPAs) and Chief Financial Officers (CFOs). The author offers a conceptual framework and strategies for the successful completion of the convergence project, adding special emphasis on business mergers and

taking a strong position on the active involvement of major players and stakeholders.

U.S. GAAP and German HGB - A comparative Approach May 06 2020 Essay from the year 2003 in the subject Business economics - Accounting and Taxes, grade: 1,5 (A), Oxford Brookes University (Business School), course: International Financial Accounting, 37 entries in the bibliography, language: English, abstract: This essay will compare and contrast the accounting systems of Germany and the United States of Amerika. First the single systems, their core concepts and purposes will be introduced. Second, the two core concepts of conservatism and true and fair value will be presented. Both systems will be examined in order to show how they incorporate these concepts and how this might affect the calculation of profits. Where data is available, selected examples from published company accounts will be shown. Finally some short comments on how the systems come closer to each other since several German companies aim for crosslistings in both countries. A conclusion will summarize the main facts. Different accounting systems might come to different results in their calculations of profits. This can be shown by drawing an example from the Siemens AG's annual report 2000. In their report based on German GAAP (General Accepted Accounting Principles) the net income in 2000 was 7,901 million €. The same calculation based on U.S. GAAP amounts in the F-20 report for the Securities and Exchange Commission (SEC) to 8,860 million € (see figure 1). Now the Question is how come this difference of nearly 14%? Is one system more exact? [...] As we have seen in assignment 1, accounting is not a science. It has been developed to serve a purpose. Accounting systems are influenced by several social and economic factors (Radebaugh and Gray, 1997). [...] It seems that German GAAP and US GAAP have different objectives. Therefore we will analyze the two systems in their national contexts now.
