Biodiversity Mar 04 2020 Conservation of biodiversity is a fundamental concern towards securing a sustainable future. This volume argues that despite various domestic and international policies and legal frameworks on biodiversity conservation — be it forest, wildlife, marine, coastal, etc. — their implementation suffers from many deficiencies. It explores the factors that hinder effective implementation of these policies and frameworks. It also analyses existing laws, both international and domestic, to identify inherent problems in the existing legal system. The book maintains that careful adherence to established procedures and protocols, public awareness, filling the lacuna in legal framework, and a strong political will are sine qua non for effective conservation of biodiversity and sustainable development. The volume defends the protection of traditional knowledge and participation of indigenous communities along with reinforcements of intellectual property in this regard. It also commends the role played by the Indian judiciary, especially the Supreme Court of India and India's National Green Tribunal for the preservation and enhancement of natural resources by applying established as also evolving principles of environmental law. This book will be useful to scholars and researchers of environmental studies, development studies, policy studies and law related to biodiversity and conservation.

Guidance on mainstreaming biodiversity for nutrition and health Jan 26 2022

Guide to Sustainable Development and Environmental Policy Aug 09 2020 The Guide to Sustainable Development and Environmental Policy is a comprehensive presentation of definitions, philosophies, policies, models, and analyses of global environmental and developmental issues. With a wealth of comparative, multidisciplinary, and geographically varied perspectives on environmental governance, it also provides detailed and balanced discussions about specific environmental issues. The guide combines formal, objective entries with critical commentaries that emphasize different opinions and controversies. With succinct explanations of more than a thousand terms, thoughtful interpretations by international experts, and helpful cross-referencing, this resource is designed to serve as a roadmap for understanding the issues and debates in the overlapping fields of environment and development. Intended for use by activists, journalists, policymakers, students, scholars, and interested citizens, the Guide to Sustainable Development and Environmental Policy will be a helpful tool for anyone trying to get a comprehensive look at the many environmental organizations, schools of thought, development programs, international environmental treaties, conventions, and strategies that have proliferated in the past few decades.

Handbook of the Convention on Biological Diversity Mar 28 2022 First Published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.

Handbook of Biodiversity Methods Aug 01 2022 Biodiversity is recognised to be of global importance, yet species and habitats continue to be under increasing pressure from human-induced influences. Environmental concerns are high on the political agenda, driving increased legislation to protect the natural environment. The starting point for much of this legislation is the requirement for a comprehensive biodiversity audit. For those needing to undertake such audits, this Handbook, first published in 2005, provides standard procedures which will enable practitioners to better monitor the condition of the biodiversity resource, resulting in improved data upon which to base future policy decisions and actions. Organised in three parts, the Handbook first addresses planning, covering method selection, experimental design, sampling strategy, and data analysis and evaluation. The second part describes survey, evaluation and monitoring methods for a broad range of habitats. Part three considers species and provides information on general methods before addressing specific methods of survey and monitoring for the major taxonomic groups.

The Economics of Ecosystems and Biodiversity in Business and Enterprise Jan 14 2021 This book is a product of the TEEB study (The Economics of Ecosystems and Biodiversity). It provides important evidence of growing corporate concern about biodiversity loss and offers examples of how leading companies are taking action to conserve biodiversity and to restore ecosystems. This book reviews indicators and drivers of biodiversity loss and ecosystem decline, and shows how these present both risks and opportunities to all businesses. It examines the changing preferences of consumers for nature-friendly products and services, and offers examples of how companies are responding. The book also describes recent initiatives to enable businesses to measure, value and report their impacts and dependencies on biodiversity and ecosystem services. The authors review a range of practical tools to manage biodiversity risks in business, with examples of how companies are using these tools to reduce costs, protect their brands and deliver real business value. The book also explores the emergence of new business models that deliver biodiversity benefits and ecosystem services on a commercial basis, the policy enabling frameworks needed to stimulate investment and entrepreneurship to realize such opportunities, and the obstacles that must be overcome. The book further examines how businesses can align their actions in relation to biodiversity and ecosystem services with other corporate responsibility initiatives, including community engagement and poverty reduction. Finally, the book concludes with a summary and recommendations for action.

Guidelines for reintroductions and other conservation translocations Jan 02 2020 "As the world's biodiversity faces the incessant threats of habitat loss, invasive species and climate change, there is an increasing need to consider more direct conservation interventions. Humans have moved organisms between sites for their own purposes for millennia, and this has yielded benefits for human kind, but in some cases has led to disastrous impacts. In response to this complex aspect of conservation management, the IUCN Species Survival Commission (SSC) Reintroduction Specialist Group (RSG) and Invasive Species Specialist Group (ISSG) have revised and published the IUCN 'Guidelines for Reintroductions and Other Conservation Translocations'—Website.

Biodiversity Conservation Handbook Apr 16 2021 The Biodiversity Conservation Handbook is designed to assist state and local policymakers who wish to "think globally and act locally" by developing a state or local biodiversity program. In addition to providing background on biodiversity generally and the importance of such programs at the state and local level, it looks at how science can inform and be incorporated into biodiversity programs, the various legal tools states can use in implementing such programs, and the importance of considering people's social and economic needs in designing biodiversity programs. Last, it examines the steps Pennsylvania has taken to conserve and restore the native biodiversity within its borders.

Drafting a Conservation Blueprint Nov 04 2022 Drafting a Conservation Blueprint lays out for the first time in book form a step-by-step planning process for conserving the biological diversity of entire regions. In an engaging and accessible style, the author explains how to develop a regional conservation plan and offers experience-based guidance that brings together relevant information from the fields of ecology, conservation biology, planning, and policy. Individual chapters outline and discuss the main steps of the planning process, including: • an overview of the planning framework • selecting conservation targets and setting goals • assessing existing conservation areas and filling information gaps • assessing population viability and ecological integrity • selecting and designing a portfolio of conservation areas • assessing threats and setting priorities A concluding section offers advice on turning conservation plans into action, along with specific examples from around the world. The book brings together a wide range of information about conservation planning that is grounded in both a strong scientific foundation and in the realities of implementation.

The Sustainable Forestry Handbook Jun 06 2020 The Sustainable Forestry Handbook is widely considered to be the essential aid to understanding and implementing sustainable forest management. Providing a clear and concise guide to the practicalities of implementing international standards for sustainable forest management, this fully updated second edition covers new Forest Stewardship Council requirements, High Conservation Value Forests, clearer requirements on pesticides and developments in policy and forest governance. Aimed at forest managers, and employing extensive cross referencing and easy-to-understand illustrations, this highly practical handbook explains in clear terms what the standards require forest managers to do and how they might go about implementing them.

Routledge Handbook of Biodiversity and the Law May 30 2022 This volume provides a reference textbook and comprehensive compilation of multifaceted perspectives on the legal issues arising from the conservation and exploitation of non-human biological resources. Contributors include leading academics, policy-makers and practitioners reviewing a range of socio-legal issues concerning the relationships between humankind and the natural world. The Routledge Handbook of Biodiversity and the Law includes chapters on fundamental and cutting-edge issues, including discussion of major legal instruments such as the Convention on Biological Diversity and the Nagoya Protocol. The book is divided into six distinct parts based around the major objectives which have emerged from legal frameworks concerned with protecting biodiversity. Following introductory chapters, Part II examines issues relating to conservation and sustainable use of biodiversity, with Part III focusing on access and benefit-sharing. Part IV discusses legal issues associated with the protection of traditional knowledge, cultural heritage and indigenous human rights. Parts V and VI focus on a selection of intellectual property issues connected to the commercial exploitation of biological resources, and analyse ethical issues, including viewpoints from economic, ethnobotanical, pharmaceutical and other scientific industry perspectives.

A Simple Guide to Intellectual Property Rights, Biodiversity and Traditional Knowledge Feb 01 2020

The Cultural Heritage of Sikkim Jul 20 2021 Sikkim has been a region of anthropological interest since the 1930s when Geoffrey Gorer and John Morris did their fieldwork among the Lepchas of Dzongu, north Sikkim. While it was mentioned in various writings of travellers and administrators during the British period, there is a dearth of literature even today on the rich heritage of Sikkim. This collection of twenty-five essays presented first at the international conference on Cultural Heritage of Sikkim, organized by the Department of Anthropology, Sikkim University, Gangtok goes a long way in breaching this gap. The book will be of immense interest to scholars and students of Anthropology, Sociology and Cultural Studies and will lead to new research on the people and the places of Sikkim and India's North-East. Please note: This title is co-published with Manohar Publishers, New Delhi. Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka

Biodiversity Sep 02 2022 Discusses the many different life forms that have existed on Earth, their importance, and how they have changed over time.

Handbook of Incentive Measures for Biodiversity Design and Implementation Oct 23 2021 This unique Handbook draws on the experiences described in 22 case studies to develop a comprehensive step-by-step process for identifying and implementing appropriate incentive measures for biodiversity conservation, and the sustainable use of its components.

The Rough Guide to Australia Feb 12 2021 With fresh journalistic writing and reams of information on what to see and do, this guide takes readers from the big cities to the countryside. Includes candid reviews on restaurants and accommodations for all budgets. 83 maps. Full-color insert. Two-color throughout.

Strategic Environmental Assessment in International and European Law May 18 2021 Makes an important contribution to the literature on SEA by drawing on and integrating international and European jurisprudence and scholarship as well as the policy science literature on SEA and environmental assessment. The result is a rich analysis that provides environmental assessment professionals with an overview of the legal context in which assessments are carried out while also providing lawyers with valuable insights into the operation of SEA in policy formulation both within and beyond the state. Dr Neil Craik author of The International Law of Environmental Impact Assessment

Routledge Handbook of Ecosystem Services Sep 29 2019 The idea that nature provides services to people is one of the most powerful concepts to have emerged over the last two decades. It is shaping our understanding of the role that biodiverse ecosystems play in the environment and their benefits for humankind. As a result, there is a growing interest in operational and methodological issues surrounding ecosystem services amongst environmental managers, and many institutions are now developing teaching programmes to equip the next generation with the skills needed to apply the concepts more effectively. This handbook provides a comprehensive reference text on ecosystem services, integrating natural and social science (including economics). Collectively the chapters, written by the world's leading authorities, demonstrate the importance of biodiversity for people, policy and practice. They also show how the value of ecosystems to society can be expressed in monetary and non-monetary terms, so that the environment can be better taken into account in decision making. The significance of the ecosystem service paradigm is that it helps us redefine and better communicate the relationships between people and nature. It is shown how these are essential to resolving challenges such as sustainable development and poverty reduction, and the creation of a green economy in developing and developed world contexts.

Research Handbook on Biodiversity and Law Oct 03 2022 The crucial importance of biodiversity law to future human welfare is only now being fully appreciated. This wide-ranging Handbook presents a range of perspectives from leading international experts reflecting up-to-date research thinking on the vital subject of biodiversity and its interaction with law. Through a rigorous examination of the principles, procedures and practices that characterise this area of law, this timely volume effectively highlights its objectives, implementation, achievements, and prospects. More specifically, the work addresses the regulatory challenges posed by the principal contemporary threats to biological diversity, the applicable general principles of international environmental law and the visions, values and voices that are shaping the development of the law. Presenting thematic rather than regime-based coverage, the editors demonstrate the state-of-the-art of current research and identify future research needs and directions. This comprehensive and authoritative Handbook will be an indispensable resource for legal scholars, students and practitioners alike.

Biodiversity and the livestock sector - Guidelines for quantitative assessment May 06 2020 The Technical Advisory Group (TAG) on biodiversity, hereafter called Biodiversity TAG, is composed of 25 international experts in ecology, biodiversity indicators, agronomy, life cycle assessment, livestock production systems, and environmental science. Their backgrounds, complementary between systems and regions, allowed them to understand and address different perspectives. The aim of the methodology developed in these guidelines is to introduce a harmonized international approach for assessing the impacts of livestock on biodiversity. The

livestock sector is a major user of natural resources (land in particular) and an important contributor to pollution (e.g. causing nutrient losses, increasing greenhouse gas emissions), which makes it one of the sectors with the highest impact on biodiversity. At the same time, livestock production is one of the few sectors with not only negative but also positive impacts on biodiversity; therefore, the sector can pull two levers to improve its biodiversity performance – mitigate harm and maximize benefits. Many environmental assessments of the livestock sector have not addressed biodiversity because of its intrinsic complexity. These guidelines strive to include biodiversity in environmental assessments, in order to increase the understanding of the impacts of livestock on biodiversity and to reveal possible synergies or trade-offs with other environmental criteria or Sustainable Development Goals (SDGs). Several indicators in these guidelines are also of relevance for the UN Decade on Ecosystem Restoration.

What Species Mean Oct 30 2019 Everyone uses species. All human cultures, whether using science or not, name species. Species are the basic units for science, from ecosystems to model organisms. Yet, there are communication gaps between the scientists who name species, called taxonomists or systematists, and those who use species names—everyone else. This book opens the “black box” of species names, to explain the tricks of the name-makers to the name-users. Species are real, and have macroevolutionary meaning, and it follows that systematists use a broadly macroevolution-oriented approach in describing diversity. But scientific names are used by all areas of science, including many fields such as ecology that focus on timescales more dominated by microevolutionary processes. This book explores why different groups of scientists understand and use the names given to species in very different ways, and the consequences for measuring and understanding biodiversity.

Guidelines on assessing biodiverse foods in dietary intake surveys Sep 09 2020 To make full use of available food biodiversity to enhance the nutritional status of populations, a better understanding of food biodiversity information in dietary intake is required. Currently, there are few national and regional food consumption surveys that report food biodiversity, particularly at the cultivar/breed level. Co-published with Bioversity International, these pioneering guidelines will facilitate the adaptation of existing dietary assessment instruments to better capture food biodiversity

Rocky Mountains Regional Plan Standards and Guidelines Jul 08 2020

Targhee National Forest (N.F.), Targhee National Forest (N.F.) Plan Oil and Gas Leasing Analysis, Bonneville County, Butte County, Clark County, Fremont County, Madison County [ID], Teton County [WY] Aug 21 2021

Principles for the assessment of livestock impacts on biodiversity Sep 21 2021 The provision of guidance for the quantitative assessment of biodiversity in live-stock and other sectors is an emerging area of work. This document represents an initial step in which international experts with various backgrounds shared their views on biodiversity assessment. The general objective of this document was to develop principles applicable to different assessment methods in order to guarantee a minimum level of soundness, transparency, scientific relevance, and completeness. These principles can be used to identify crucial elements of livestock systems that affect biodiversity, to monitor changes and make improvements, and to produce assessment results for internal or external communication.

Handbook of the Convention on Biological Diversity Feb 24 2022 In 1992, at the Earth Summit in Rio, the United Nations adopted the Convention on Biological Diversity (CBD) to agree international measures aimed at preserving the vital ecosystems and biological resources on which we all depend. This is the official handbook to the Convention and presents all the most important information about the CBD, including a guide to the decisions adopted and to ongoing activities. It is an essential resource for all the governments, intergovernmental agencies, NGOs and conservation bodies and researchers working in this area. Included with the book is a fully indexed and cross-referenced CD-ROM containing all the relevant background material to the Convention, linked to relevant decisions and other sources of information.

Improving EIA practice: Best Practice Guide for publishing primary biodiversity data Jan 06 2023

The Routledge Handbook of Sustainable Cities and Landscapes in the Pacific Rim Nov 11 2020 This handbook addresses a growing list of challenges faced by regions and cities in the Pacific Rim, drawing connections around the what, why, and how questions that are fundamental to sustainable development policies and planning practices. These include the connection between cities and surrounding landscapes, across different boundaries and scales; the persistence of environmental and development inequities; and the growing impacts of global climate change, including how physical conditions and social implications are being anticipated and addressed. Building upon localized knowledge and contextualized experiences, this edited collection brings attention to place-based approaches across the Pacific Rim and makes an important contribution to the scholarly and practical understanding of sustainable urban development models that have mostly emerged out of the Western experiences. Nine sections, each grounded in research, dialogue, and collaboration with practical examples and analysis, focus on a theme or dimension that carries critical impacts on a holistic vision of city-landscape development, such as resilient communities, ecosystem services and biodiversity, energy, water, health, and planning and engagement. This international edited collection will appeal to academics and students engaged in research involving landscape architecture, architecture, planning, public policy, law, urban studies, geography, environmental science, and area studies. It also informs policy makers, professionals, and advocates of actionable knowledge and adoptable ideas by connecting those issues with the Sustainable Development Goals (SDGs) of the United Nations. The collection of writings presented in this book speaks to multyear collaboration of scholars through the APRU Sustainable Cities and Landscapes (SCL) Program and its global network, facilitated by SCL Annual Conferences and involving more than 100 contributors from more than 30 institutions. The Open Access version of chapters 1, 2, 4, 11, 17, 23, 30, 37, 42, 49, and 56 of this book, available at <http://www.taylorfrancis.com/books/e/9781003033530>, have been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Biodiversity Integrated Assessment and Computation Tool | B-INTACT - Guidelines Dec 05 2022 Biodiversity loss is accelerating at an unprecedented rate across the planet putting a great number of species on the brink of extinction. A decline in the plants, animals, and microorganisms threatens food security, sustainable development, and the supply of vital ecosystem services. In order to meet the Sustainable Development Goals (SDGs) of the 2030 Agenda, there is an urgent need to take action to halt biodiversity loss and consequently ecosystem degradation. Since the introduction of the Aichi targets, released by the Convention on Biological Diversity (CBD) in 2010, the United Nations have been empowered with greater influence on decision-making impacting biodiversity. However, there was an urgent need for an easy-to-use tool to rapidly, yet effectively assess the impact on biodiversity posed by projects, programmes, and policies. As a timely response, the Food and Agriculture Organization of the United Nations (FAO) has developed the Biodiversity Integrated Assessment and Computation Tool (B-INTACT). B-INTACT extends the scope of environmental assessments to capture biodiversity concerns, which are not accounted for in conventional carbon pricing. The tool is designed for users ranging from national investment banks, international financial institutions and policy decision-makers, and allows for a thorough biodiversity assessment of project-level activities in the Agriculture, Forestry and Land Use (AFOLU) sector. The second version of the guidelines includes additional information on how to use B-INTACT together with FAO's Earthmap platform and the Ecosystem Service Valuation Database.

The Thomson Ecology Handbook Aug 28 2019

A Guide to Designing Legal and Institutional Frameworks on Alien Invasive Species Apr 04 2020 This guide seeks to help by providing national law and policy makers with practical information and guidance for developing or strengthening legal and institutional frameworks on alien invasive species, consistent with Article 8(h) of the CBD, as well as pertinent obligations under other international instruments. It provides a structured framework for dealing with alien invasive species issues and contains illustrations and practical examples to assist in understanding their impact.

A Guide to Undertaking Biodiversity Legal and Institutional Profiles Apr 28 2022 Biodiversity-related laws and institutions will be key mechanisms for attaining the objectives of the Convention on biological diversity. As part of the national biodiversity planning process, legal and institutional profiles should be undertaken to ascertain which laws apply to and affect biodiversity and which institutions oversee legislation and portfolios which intersect with biodiversity conservation, sustainable use and benefit-sharing of genetic resources. Drawing on lessons learned in Bangladesh, Cuba and the Gambia, this will provide legal practitioners with background information and a suggested analytical road map for reviewing their country's particular legal and institutional situation.

Routledge Handbook of Agricultural Biodiversity Jun 30 2022 The world relies on very few crop and animal species for agriculture and to supply its food needs. In recent decades, there has been increased appreciation of the risk this implies for food security and quality, especially in times of environmental change. As a result, agricultural biodiversity has moved to the top of research and policy agendas. This Handbook presents a comprehensive overview of our current knowledge of agricultural biodiversity in a series of specially commissioned chapters. It draws on multiple disciplines including plant and animal genetics, ecology, crop and animal science, food studies and nutrition, as well as social science subjects which explore the socio-economic, cultural, institutional, legal and policy aspects of agricultural biodiversity. It focuses not only on the core requirements to deliver a sustainable agriculture and food supply, but also highlights the additional ecosystem services provided by a diverse and resilient agricultural landscape and farming practices. The book provides an indispensable reference textbook for a wide range of courses in agriculture, ecology, biodiversity conservation and environmental studies.

A Guide to Undertaking Biodiversity Legal and Institutional Profiles Dec 25 2021 Biodiversity-related laws and institutions will be key mechanisms for attaining the objectives of the Convention on biological diversity. As part of the national biodiversity planning process, legal and institutional profiles should be undertaken to ascertain which laws apply to and affect biodiversity and which institutions oversee legislation and portfolios which intersect with biodiversity conservation, sustainable use and benefit-sharing of genetic resources. Drawing on lessons learned in Bangladesh, Cuba and the Gambia, this will provide legal practitioners with background information and a suggested analytical road map for reviewing their country's particular legal and institutional situation.

Incorporating Indigenous Rights in the International Regime on Biodiversity Protection Oct 11 2020 In Incorporating Indigenous Rights in the International Regime on Biodiversity Protection, Federica Cittadino convincingly interprets the Convention on Biological Diversity (CBD) and its related instruments in light of indigenous rights and the principle of self-determination.

Report of the Expert Consultation on Guidelines for Responsible Fisheries Management, Wellington, New Zealand, 23-27 January 1995 Nov 23 2021 Two informal Working Groups worked through the document presented as an annex to this report, making a paragraph by paragraph commentary and critique, respectively from the perspective of the fisheries managers, and from that of the technical staff responsible for implementing management guidelines. A new structure was proposed for the document, as well as a list of new topics to be addressed, and a strategy for tackling this task.

The Rough Guide to Vietnam Dec 13 2020 The Rough Guide to Vietnam is the most accurate and in-depth resource available for anyone wishing to explore Southeast Asia's fastest-growing destination. Plan a visit to the recently opened Hanoi Citadel to learn about this 1000-year-old city, or to the Saigon Skydeck to see how rapidly Ho Chi Minh City is changing. You'll find detailed listings for these and all other destinations in the country, with recommendations for accommodation ranging from cheap hostels to luxurious beach resorts, as well as insider's tips on the best places to head to sample Vietnamese cuisine. With Rough Guides' shopping listings, it's also easy to find the best places to buy traditional handicrafts and iconic souvenirs such as conical hats. Whether you're looking for a detailed itinerary for a memorable trip, or background information about Vietnam's complex history, you'll find it all in The Rough Guide to Vietnam. Make the most of your time on Earth™ with The Rough Guide to Vietnam.
