Better Questioning for Better Learning Jun 30 2022 Learn how to ask deeper questions and develop better questioning habits with this important resource. Author Benjamin Stewart Johnson takes you step by step through the key considerations and brain-based research to keep in mind when developing questions. He begins with an overview of why it's important to understand participants' thought process when being asked questions. He then shows how to set expectations for virtual questions and face-to-face questions; how to plan authentic, higher-order questions; how to scaffold and differentiate questions; and how to avoid zombie questions. In addition, he debunks myths such as wait time and points out the best ways to help learners support their answers, use questions to check for understanding, and more. Each section concludes by helping you create an action plan to improve your skills in a given area. Appropriate for teachers, instructional coaches, training facilitators, and specialists, the book can be used independently or in schoolwide book studies to help educators of all subjects and grades improve the depth and quality of their questioning.

Powerful Teaching Aug 21 2021 Unleash powerful teaching and the science of learning in your classroom *Powerful Teaching: Unleash the Science of Learning* empowers educators to harness rigorous research on how students learn and unleash it in their classrooms. In this book, cognitive scientist Pooja K. Agarwal, Ph.D., and veteran K-12 teacher Patrice M. Bain, Ed.S., decipher cognitive science research and illustrate ways to successfully apply the science of learning in classrooms settings. This practical resource is filled with evidence-based strategies that are easily implemented in less than a minute—without additional prepping, grading, or funding! Research demonstrates that these powerful strategies raise student achievement by a letter grade or more; boost learning for diverse students, grade levels, and subject areas; and

enhance students' higher order learning and transfer of knowledge beyond the classroom. Drawing on a fifteen-year scientist-teacher collaboration, more than 100 years of research on learning, and rich experiences from educators in K-12 and higher education, the authors present highly accessible step-by-step guidance on how to transform teaching with four essential strategies: Retrieval practice, spacing, interleaving, and feedback-driven metacognition. With *Powerful Teaching*, you will: Develop a deep understanding of powerful teaching strategies based on the science of learning Gain insight from real-world examples of how evidence-based strategies are being implemented in a variety of academic settings Think critically about your current teaching practices from a research-based perspective Develop tools to share the science of learning with students and parents, ensuring success inside and outside the classroom *Powerful Teaching: Unleash the Science of Learning* is an indispensable resource for educators who want to take their instruction to the next level. Equipped with scientific knowledge and evidence-based tools, turn your teaching into powerful teaching and unleash student learning in your classroom.

Facilitating Group Learning Oct 23 2021 Praise for *Facilitating Group Learning* "In this engaging and accessible book, George Lakey draws on a lifetime's experience to provide a highly practical resource to anyone seeking to understand and respond to the complexities of group work. The book will be invaluable to anyone trying to effect social change through groups while striving to stay simultaneously sane and employed." Stephen D. Brookfield, Distinguished University Professor, University of St. Thomas "I've been working with forms of direct education for many decades, and I found new ideas and inspirations in every chapter. For anyone involved in teaching, training, sharing skills, or leading groups, this book is an invaluable resource!" Starhawk, author, *The Earth Path, Dreaming the Dark, and Webs of Power* "George Lakey has inspired our union to engage in education in a way that challenges us to redefine social justice and equality in new and exciting ways. This book helps us to continue our journey to touch the souls of union members." Denis Lemelin, national president, Canadian Union of Postal Workers "Facilitating Group Learning will ease the way of all who venture into the white waters of facilitation. George clarifies the most basic, complex, and

nagging challenges of facilitation, while honoring the realities of individual and social power dynamics and providing real-life examples from the path of continued growth and mastery. A rare gift!" Niyonu D. Spann, founding president, TRV Consulting and Beyond Diversity 101 "This book is a must-read for people who teach adults of any age, no matter what the subject, and care about doing it in ways that yield deep and abiding learning. Wonderfully well-written and rich with psychological and spiritual insights as well as practical strategies, it represents the fruits of a lifetime of transformational teaching and learning by one of the foremost adult educators of our time." Parker J. Palmer, author, *The Courage to Teach, Let Your Life Speak, and The Heart of Higher Education*

EdPsych Modules Aug 28 2019 Now with SAGE Publications, Cheryl Cisero Durwin and Marla Reese-Weber's EdPsych Modules uses an innovative implementation of case studies and a modular format to address the challenge of effectively connecting theory and research to practice. Each module is a succinct, stand-alone topic that represents every subject found in traditional chapter texts and can be used in any order for maximum flexibility in organizing your course. Each of the book's eight units of modules begins with a set of four case studies—early childhood, elementary, middle school, and secondary—and ends with "Assess" and "Reflect and Evaluate" questions and activities to encourage comprehension and application of the research and theories presented. The case approach and the extensive pedagogy that support it allows students to constantly see the applications of the theories and research that they are studying in the text.

The Cambridge Handbook of Cognition and Education Jul 08 2020 This Handbook reviews a wealth of research in cognitive and educational psychology that investigates how to enhance learning and instruction to aid students struggling to learn and to advise teachers on how best to support student learning. The Handbook includes features that inform readers about how to improve instruction and student achievement based on scientific evidence across different domains, including science, mathematics, reading and writing. Each chapter supplies a description of the learning goal, a balanced presentation of the current evidence about the efficacy of various approaches to obtaining that learning goal, and a discussion of important future directions for research in this area. It is the ideal resource for researchers continuing their study of this field or for those only now beginning to explore how to improve student achievement.

Learning to Think Apr 28 2022 Considers the connection between thinking and knowledge for the development of a learning process that includes all levels of education, in an effort to enhance critical thinking skills for the future. **Visual Thinking Strategies** Oct 11 2020 "What's going on in this picture?" With this one question and a carefully chosen work of art, teachers can start their students down a path toward deeper learning and other skills now encouraged by the Common Core State Standards. The Visual Thinking Strategies (VTS) teaching method has been successfully implemented in schools, districts, and cultural institutions nationwide, including bilingual schools in California, West Orange Public Schools in New Jersey, and the San Francisco Museum of Modern Art. It provides for open-ended yet highly structured discussions of visual art, and significantly increases students' critical thinking, language, and literacy skills along the way. Philip Yenawine, former education director of New York's Museum of Modern Art and cocreator of the VTS curriculum, writes engagingly about his years of experience with elementary school students in the classroom. He reveals how VTS was developed and demonstrates how teachers are using art—as well as poems, primary documents, and other visual artifacts—to increase a variety of skills, including writing, listening, and speaking, across a range of subjects. The book shows how VTS can be easily and effectively integrated into elementary classroom lessons in just ten hours of a school year to create learner-centered environments where students at all levels are involved in rich, absorbing discussions.

Learning to Love Math Jun 18 2021 Is there a way to get students to love math? Dr. Judy Willis responds with an emphatic yes in this informative guide to getting better results in math class. Tapping into abundant research on how the brain works, Willis presents a practical approach for how we can improve academic results by demonstrating certain behaviors and teaching students in a way that minimizes negativity. With a straightforward and accessible style, Willis shares the knowledge and experience she has gained through her

dual careers as a math teacher and a neurologist. In addition to learning basic brain anatomy and function, readers will learn how to * Improve deep-seated negative attitudes toward math. * Plan lessons with the goal of "achievable challenge" in mind. * Reduce mistake anxiety with techniques such as errorless math and estimation. * Teach to different individual learning strengths and skill levels. * Spark motivation. * Relate math to students' personal interests and goals. * Support students in setting short-term and long-term goals. * Convince students that they can change their intelligence. With dozens of strategies teachers can use right now, *Learning to Love Math* puts the power of research directly into the hands of educators. A Brain Owner's Manual, which dives deeper into the structure and function of the brain, is also included—providing a clear explanation of how memories are formed and how skills are learned. With informed teachers guiding them, students will discover that they can build a better brain . . . and learn to love math!

Violin Secrets Apr 16 2021 In Violin Secrets: 101 Performance Strategies for the Advanced Violinist, author and violinist Jo Nardolillo surveys the cutting edge of current violin technique, combining tradition and innovation in one volume. Blending traditional strategies that have produced generations of legendary performers with modern ideas, Nardolillo reveals the secrets of today's most sought-after

master teachers, garnered through her decade of study at top conservatories across the nation. With more than a quarter century of experience teaching at the advanced level, she has refined and distilled these essential concepts into clear, concise, step-by-step instructions, complete with original illustrations and helpful tips. Violin Secrets is an indispensable resource for any and all serious violinists. The first chapter tackles the toughest challenge on the wish list of every established professional, dedicated student, and passionate amateur: understanding why immaculate intonation is so difficult (and exploring ways to achieve it). Further chapters address the advanced techniques of fingerboard mapping, mastering spiccato, controlling vibrato, playing into the curve, small-hand technique, and navigating comfortably in high positions. An extensive section on practice strategies blends concepts from learning theory, sports psychology, and Zen, and the chapter on artistry offers insight on creating expressive phrases, connecting with the audience, and developing a unique artistic voice. Violin Secrets examines overcoming performance anxiety, choosing the right music editions, being a strong section player in an orchestra, leading productive chamber music rehearsals, and winning auditions. Violin Secrets is beautifully illustrated with original drawings by T. M. Larsen, musical examples from the standard literature, and a violinist's family tree that traces these secrets back through to the founding fathers of violin technique. The Music Secrets for the Advanced Musician series is designed for instrumentalists, singers, conductors, composers, and other instructors and professionals seeking a quick set of pointers to improve their work as performers and producers of music. Easy to use and intended for the advanced musician, contributions to Music Secrets fill a niche for those who have moved beyond what beginners and intermediate practitioners need.

Teach Yourself How to Learn Jan 26 2022

Following up on her acclaimed *Teach Students How to Learn*, that describes teaching strategies to facilitate dramatic improvements in student learning and success, Sandra McGuire here presents these "secrets" direct to students. Her message is that "Any student can use simple, straightforward strategies to start making A's in their courses and enjoy a lifetime of deep, effective learning." Beginning with explaining how expectations about learning, and the study efforts required, differ between college and secondary school, the author introduces her readers, through the concept of metacognition, to the importance and powerful consequences of understanding themselves as learners. This framework and the recommended strategies that support it are useful for anyone moving on to a more advanced stage of education, so this book also has an intended audience of students preparing to go to high school, graduate school, or professional school. In a conversational tone, and liberally illustrated by anecdotes of past students, the author combines introducing readers to concepts like Bloom's Taxonomy (to illuminate the difference between studying and learning), fixed and growth mindsets, as well as to what brain science has to tell us about rest, nutrition and exercise, together with such highly specific learning strategies as how to read a textbook, manage their time and take tests. With engaging exercises and thought-provoking reflections, this book is an ideal motivational and practical text for study skills and first year experience courses.
