A Holistic Approach to Ship Design Mar 15 2021 This book introduces a holistic approach to ship design and its optimisation for life-cycle operation. It deals with the scientific background of the adopted approach and the associated synthesis model, which follows modern computer aided engineering (CAE) procedures. It integrates techno-economic databases, calculation and multi-objective optimisation modules and s/w tools with a well-established Computer-Aided Design (CAD) platform, along with a Virtual Vessel Framework (VVF), which will allow virtual testing before the building phase of a new vessel. The resulting graphic user interface (GUI) and information exchange systems enable the exploration of the huge design space to a much larger extent and in less time than is currently possible, thus leading to new insights and promising new design alternatives. The book not only covers the various stages of the design of the main ship system, but also addresses relevant major onboard systems/components in terms of life-cycle performance to offer readers a better understanding of suitable outfitting details, which is a key aspect when it comes the outfitting-intensive products of international shipyards. The book disseminates results of the EU funded Horizon 2020 project HOLISHIP.

Fundamentals of Automotive Maintenance and Light Repair Apr 27 2022 Designed to prepare new technicians for ASE G1 Certification, Fundamentals of Automotive Maintenance and Light Repair, Second Edition covers the foundational theory and skills necessary to prepare entry-level technicians to maintain and repair today's light duty vehicles.

Seaforth World Naval Review 2015 Jan 13 2021 Now in its seventh year, this annual has established an international reputation as an authoritative but affordable summary of all that has happened in the naval world in the previous twelve months. It combines regional surveys with one-off major articles on noteworthy new ships and other important developments. Besides the latest warship projects, it also looks at wider issues of importance to navies, such as aviation and electronics, and calls on expertise from around the globe to give a balanced picture of what is going on and to interpret its significance. The 2015 edition looks in detail at the French Navy and the Bangladesh and Myanmar navies, while significant ships include the Montford Point class mobile landing platforms, the Samuel Becket offshore patrol vessels, and the Skjold class fast attack craft. There are technological reviews dealing with naval aviation by David Hobbs, and current mine warfare developments by Norman Friedman, while warship recycling is discussed by Ian Buxton. Intended to make interesting reading as well as providing authoritative reference, there is a strong visual emphasis, including specially commissioned drawings and the most up-to-date photographs and artists' impressions. For anyone with an interest in contemporary naval affairs, whether an enthusiast or a defence professional, this annual has become required reading.

Marine Diesel Engines Maintenance and Repair Manual Sep 08 2020 By means of superb photos and diagrams, Pallas explains in simple terms the operation of a diesel engine and shows how to maintain and repair it should it break down. This book will be an invaluable reference for when things go wrong.

Development of Smart Context-aware Services for Cargo Transportation Aug 20 2021 With a focus on cargo transportation, this book addresses the development of approaches intended to secure an infrastructure of smart services to support the adaptive implementation of online multi-modal freight transport management processes. It discusses the development of multi-criteria decision-making components and their integration into the multi-layered computer-based information management of intelligent systems. Through detailed descriptions of various components of intelligent transport management systems, the book demonstrates how to develop the services needed in the right place and at the right time, and how to properly adapt to user needs, making necessary interventions to ensure the safety of the transportation process. Further, it describes the main ways to increase the autonomy and efficiency of user-vehicle interaction and shows how Information and Communications Technology (ICT) structural support for current and past situations in AI-based systems can help to anticipate future developments in freight transportation.

Audi A4 Diesel May 29 2022 This is a service and repair manual for the DIY mechanic. The book covers the Audi A4 diesel (08-65) vehicles.

Fundamentals of Medium/Heavy Duty Diesel Engines Sep 01 2022 Thoroughly updated and expanded, Fundamentals of Medium/Heavy Diesel Engines, Second Edition offers comprehensive coverage of basic concepts and fundamentals, building up to advanced instruction on the latest technology coming to market

for medium- and heavy-duty diesel engine systems.

Transfer of Business and Acquired Employee Rights May 05 2020 This book provides practical, business-orientated and accessible guidance on key employment and labour law aspects in national and international transfers of business in the European Union, its member states and selected important countries around the world. It contains a comprehensive overview of relevant topics such as safeguarding of employees' rights, impacts on employees' representatives and on collective agreements, company pension entitlements, insolvency, M&A transactions and cross-border transfers of business for each country covered. This overview is accompanied by summaries of leading case law and excerpts of important national regulations. Transfers of business play an important role in today's globalised business world. In particular, employment and labour impacts of transfers of businesses are often a driving legal and business factor in national and international restructurings and M&A transactions. The successful implementation of transfers of business requires to recognise and comply with the relevant legal frameworks of the countries involved. This publication is written by specialised employment lawyers from around the globe and addresses in-house counsels, human resources managers and legal advisors in charge of or accompanying national or international transactions.

Institutional Innovations in the Delivery of Farm Services in India Dec 12 2020 This book uses primary evidence to assess the value of agro-input and service delivery business models in terms of their inclusiveness, effectiveness and impact from a small farmer perspective, in the form of case studies in three Indian states: Punjab, Bihar and Uttar Pradesh. The services discussed include custom rental of farm machinery and equipment, franchising for backward and forward linkage for farmers and the

supermarkets for delivery of farm inputs, and extension services. The book examines agro-input and service delivery business models as institutional innovations for inclusive and effective delivery of such services in the small farmer context, based on primary data from the agencies designing and implementing such models and the farmers who make use of these inputs and services. Further, it identifies major issues and challenges in the delivery of farm inputs and services across regions and types of farmers and examines possible policy and enabling provisions to promote cost-effective and high-quality agro-input delivery channels.

Achieving Brand Loyalty in China through After-Sales Services Apr 15 2021 This paper provides a guideline for how the entire process chain of automotive after-sales services could be researched in China. In addition, Schwartz's individual level value theory is introduced as a beneficial operationalisation approach to cultural marketing. So, values are modelled as exogenous variables in order to show which ones are really causal. A total of 301 Chinese workshop customers were surveyed to assess the critical success factors of after-sales services via partial least squares structural equation modelling. After-sales services have become very important in the automobile industry. However, this area has not been sufficiently researched, particularly with regard to China, the most important car market globally.

How to Rebuild Ford Power Stroke Diesel Engines 1994-2007 Oct 10 2020 This book covers the vast majority of Powerstroke Diesel engines on the road, and gives you the full story on their design. Each part of the engine is described and discussed in detail, with full-color photos of every critical component. A full and complete step-by-step engine rebuild is also included.

Digital Nations – Smart Cities, Innovation, and Sustainability Aug 08 2020 This book constitutes the refereed conference proceedings of the 16th IFIP WG 6.11 Conference on e-Business, e-Services and e-Society, I3E 2017, held in Delhi, India, in November 2017. The 45 revised full papers presented were carefully reviewed and selected from 92 submissions. They are organized in the following topical sections: Adoption of Smart Services; Assessment of ICT Enabled Smart Initiatives; Analytics for Smart Governance; Social Media and Web 3.0 for Smartness; and Smart Solutions for the Future.

Third Street Light Rail Project, Transportation Improvements, San Francisco Nov 03 2022
Auto Repair For Dummies Oct 02 2022 Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Sustainable Development - Proceedings Of The 2015 International Conference (Icisd2015) Nov 10

2020 Since the emergence of climate and global warming onto the international agenda, research in sustainability has been underpinned by the development in energy and environmental science.

Highlighted 30 years ago by the Brundtland Commission, 'sustainable development' was defined as: meeting the needs of the present without compromising the ability of future generations to meet their own needs. This has very much defined the scope and aims of this conference. This conference proceedings book contains the selected papers presented in the 2015 International Conference on Sustainable Development (ICSD2015) held in September 25-27, 2015, in Wuhan, Hubei, China. The conference positions itself as an international forum for researchers all over the world to come together to share and discuss their findings and contributions in all aspects of sustainability; including theory, methodology and applications covering a wide spectrum of topics and issues. The conference proceedings put together a total of 119 papers in sustainable development, covering issues in environmental, energy, and economical aspects of the subjects.

Handbook of Research on Industrial Applications for Improved Supply Chain Performance Dec 24 2021

In the industrial world, companies are always seeking competitive advantages to sustain themselves in the globalized market. A supply chain is one of these improvements that managers implement in order to stay ahead of the competition. However, certain methods of supply chains add risks such as the addition of costs, possible accidents, and economic losses. Because of this, companies are looking for techniques in which to progress their supply chain execution. The Handbook of Research on Industrial Applications for Improved Supply Chain Performance is a pivotal reference source that identifies techniques, tools, and methodologies that can improve supply chain performance and enable businesses to generate a competitive advantage in the globalized market. While highlighting topics such as material flow, route optimization, and green distribution, this publication is ideally designed for managers, executives, logistics engineers, production managers, warehouse operations managers, board directors, consultants, analysts, inventory control managers, researchers, academicians, industrial and managerial professionals, practitioners, and students looking to improve costs and quality of supply chains.
