This handbook is designed for both medical professionals and non-healthcare individuals. It aims to establish a sound understanding of the mechanisms underlying basic life support. The Checklist Manifesto Feb 13 2021 The New York Times bestselling author of *Being Mortal* and *Complications* reveals the surprising power of the ordinary checklist We live in a world of great and increasing complexity, where even the most expert professionals struggle to master the tasks they face. Longer training, ever more advanced technologies—neither seems to prevent grievous errors. But in a hopeful turn, acclaimed surgeon and writer Atul Gawande finds a remedy in the humblest and simplest of techniques: the checklist. First introduced decades ago by the U.S. Air Force, checklists have enabled pilots to fly aircraft of mind-boggling sophistication. Now innovative checklists are being adopted in hospitals around the world, helping doctors and nurses respond to everything from flu epidemics to avalanches. Even in the immensely complex world of surgery, a simple ninety-second variant has cut the rate of fatalities by more than a third. In riveting stories, Gawande takes us from Austria, where an emergency checklist saved a drowning victim who had spent half an hour underwater, to Michigan, where a cleanliness checklist in intensive care units virtually eliminated a type of deadly hospital infection. He explains how checklists actually work to prompt striking and immediate improvements. And he follows the checklist revolution into fields well beyond medicine, from disaster response to investment banking, skyscraper construction, and businesses of all kinds. An intellectual adventure in which lives are lost and saved and one simple idea makes a tremendous difference, *The Checklist Manifesto* is essential reading for anyone working to get things right.

Life Support Jun 19 2021 "Insightful and thought-provoking" – Rt Hon. Matt Hancock MP, Secretary of State for Health, 2018–21 "Brilliant" – Sir Stephen Bubb, director of Charity Futures and the Oxford Institute of Charity "A tour de force" – Niall Dickson CBE, former chief executive of The King's Fund, the General Medical Council and the NHS Confederation *** How good is the NHS, really? That is the question this book seeks to answer, as the health service emerges from the gravest crisis in its history with more money – but greater challenges – than ever before. During the pandemic, voters made extraordinary sacrifices to save the NHS from collapse. Thanks to these efforts and the dedication and bravery of the NHS workforce, hospitals were able to treat patients with coronavirus, but millions of others lost out. Now an exhausted and depleted NHS workforce faces a huge backlog. The gap between supply and demand for publicly funded healthcare has never been so wide. With record numbers waiting for treatment, the politicians' answer has been to spend ever more taxpayers' money. The question is whether throwing cash at the problem will work. Every day, millions of patients receive care that is fair, good or outstanding. In keeping with Nye Bevan's founding principles, the same treatment is available to rich and poor, free at the point of need. Public support for the concept remains overwhelming. Yet for every positive NHS experience there are negatives: care that is substandard, disjointed and arrives too late. A cult of secrecy surrounds errors and failings. Politicians on all sides dissemble and lie. This book seeks to strip away the spin and uncover the true state of the NHS: the good, the bad and the ugly. It explores an increasingly urgent question: in an era of pandemics, can the NHS provide the quality of service patients deserve?

Ethics, Conflict and Medical Treatment for Children E-Book Dec 26 2021 What should happen when doctors and parents disagree about what would be best for a child? When should courts become involved? Should life support be stopped against parents' wishes? The case of Charlie Gard, reached global attention in 2017. It led to widespread debate about the ethics of disagreements between doctors and parents, about the place of the law in such disputes, and about the variation in approach between different parts of the world. In this book, medical ethicists Dominic Wilkinson and Julian Savulescu critically examine the ethical questions at the heart of disputes about medical treatment for children. They use the Gard case as a springboard to a wider discussion about the rights of parents, the harms of treatment, and the vital issue of limited resources. They discuss other prominent UK and international cases of disagreement and conflict. From opposite sides of the debate Wilkinson and Savulescu provocatively outline the strongest arguments in favour of and against treatment. They analyse some of the distinctive and challenging features of treatment disputes in the 21st century and argue that disagreement about controversial ethical questions is both inevitable and desirable. They outline a series of lessons from the Gard case and propose a radical new 'dissensus' framework for future cases of disagreement. This new book critically examines the core ethical questions at the heart of disputes about medical treatment for children. The contents review prominent cases of disagreement from the UK and internationally and analyse some of the distinctive and challenging features around treatment disputes in the 21st century. The book proposes a radical new framework for future cases of disagreement around the care of gravely ill people.
